PRAEFATIO AD LECTOREM.

Novum habes , crudite lector , Lexicon Graeco-Latinum , et Latino-Graecum Romanis typis ea, quae maxima fieri potuit, diligentia et accuratione recusum: in quo edendo consultum esse voluimus non solum studiosae juventntis commodo , sed eorum etiam votis , qui licet pleniorem linguae Graecae notitiam sibi comparaverint, tamen in difficilioribus auctoribus et praesertim scriptoribus ecelesiasticis evolvendis, saepissime lexici copioso verbornm apparatu instructi auxilium desiderant. Itaque ut horum desiderio satisfaceremus, ita tamen ut invenum ratio haberetur, Hederici lexicon caeteris omnibus praetnlimus, quippe quod diuturna experientia scholis in primis aptum inventum sit, ob ernditionem autem et verborum eopiam doctis ipsis non parum utilitatis afferat . Hinc factum est nt saepissime jam editum et doctorum virorum et linguae graccae studiosorum plausu perpetno fuerit exceptum. Nec immerito quidem, cum Hedericus ipse non modo lucidum ordinem adhibnerit, verum etiam tam praeclare se gesserit, ut omnia fere vocabula quae Henrici Stephani, et Scapulae thesauris habentur, suo lexico inseruerit, significationes varias diligentissime adnotaverit, quaeque difficilia videbantur erudite illustrarit, quin tamen moles libri praeter modum excresceret.

Quamquam vero Hederici lexicon, ex quo primum in lucem prodiit, magnis landibus fuerit jure exornatum, tamen non pauca adhuc deerant, ut plene absolutum et perfectnm haberetur. Verum cum saepins ederetur. doctissimi viri in Italia, Germania, Galliis et Britannia curarent et in novam ac meliorem formam redigeretar, plura emendantes, plura etiam addentes; ita ut paullatim Ernesti, Patricii, Larcheri, Bloomfieldii, Morellii aliorumque opera ac studio majorem auctoritatem et nomen liber consequutus sit. Denigne G. Pinzgerns eruditus Germanns paucis ante annis adhortatione et consilio Francisci Passovii viri litterarum graecarnm optime meriti ob eruditum Lexicon Graeco - Teutonicum editum, manum iterum huic operi admovit, plura addidit desumpta ex commentariis recentiorum Graecae linguae cultorum, quae in prioribus editionibus deerant, plura emendavit vitiose antea edita , significationes verbornm accuratius evolvit , rationem verba construendi explicavit, non pauca magna ernditione plena de particulis linguae Graecae addidit, quibus difficillimae illae orationis partes minus aegre intelligantur, et earum plane singularis vis percipiatur, iis etiam consulens qui pocmata graeca conscribunt, vocum, ubi dubiae sunt, quantitatem adnotavit : ea denique omnia praestitit , quae Hederieum nostris temporibus accomodatiorem efficere possent. Hnnc Pinzgeri laborem viri eruditi suo calculo comprobarunt; quare us quid in nova hac editione Hederici deseste, ejus leticon tale exhibemus, quale a ho c lipiais a 83-78. editum est, sed quibnadam qui auctori exciderunt erroribus expurgatum. Quod si quae mendae adhuc vitio typodhearum superinit; eca ea non magni momenti sunt, neque frequentes: quamobrem non dubitumus quin facile eas condonatures sit beniguus leetor, immo vero etiam confidimus lexicion istud onnibus graceae linguae amatoribus gratum esse futurum, tyronibus vero magno usui et adjumento ad comparandam sibi accuratum notitium palcherimus linguae, quae janua quaedam est ad omnes fere discipilinas tum aceras tum profanas, et cujus tullias adeo late patet, ut nemo plenae eruditionis luudem sine ea consegui valeat.
